6 Companies Spun Out

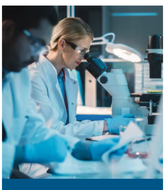

30 Gtons of CO_2 Reduction Potential by 2030

Driving Change Today for a Sustainable Tomorrow

From awareness to solutions

Look outside.
The climate has already changed. Tomorrow will be worse if we don't act today.

At the Institute for Carbon Management (ICM) at UCLA, we develop, accelerate, and invest in breakthrough technologies to combat climate change across industrial decarbonization, carbon removals and energy transition.

We work with our partners across industry, philanthropy, governments and investors for a better tomorrow. We have spinoff 6 companies already and have many more in the pipeline.

Our Partners

We align our capabilities with global partners to create pathways for impact

Corporates and Industry Players	Family Offices, Foundations and Investors	Government Agencies
Suffolk, BASF, Shell, EPRI, Boeing, MBCC Group, stripe, KIA	Temasek Foundation, Grantham Foundation, Chan Zuckerberg Initiative, Anthony & Jeanne Pritzker Family Foundation, Neglected Climate Opportunities, Rockefeller Foundation, VC Ueb, climateworks Foundation	U.S. Department of Energy, PUB, ARPA-E, National Technology Laboratory, NEUP, Federal Highway Administration
